There's a reason why real estate agents are sometimes looked upon by consumers with suspicion, and rank in the bottom fifth of 45 professions according to Gallup polls. It's not the fault of individual agents, but of a system which makes it more profitable NOT to be 100% loyal. This system is called **Dual Agency**, in which a brokerage receives two payments for representing both sides of a single transaction.

Example 2

The alternative, to which we are committed, is called **Single Agency**. The consumer is our **CLIENT**, to be *represented* in a transaction, not a **CUSTOMER** to be *sold* a product.

100% LOYALTY for our Clients...

It's what you deserve...

We have a unique way of doing business. We guarantee all of our clients 100% loyalty because we don't practice "dual agency." What is dual agency? It means the salesperson who is helping you to sell your house or buy a new one may also work for someone else on the same transaction. Agents who do this will tell you it's no problem. But can they get the best price for both you and the other party to your transaction at the same time? Don't you have different interests? We think so!

We're committed to representing our clients the way we like to be represented in our own transactions.

Please call us if you need help buying or selling property in Sonoma County, or would like a referral to a like-minded agent out of the area. We'd love to get a chance to show you the positive difference 100% loyalty can make.
